Experienced in: Mithril, Grunt, SQL, Knex.js, Phaser.io, Socket.io, Gulp, Browserify, D3.js

Projects

MakerSpace - Software Engineer | https://github.com/pear-programming/MakerSpace   2016
Room reservation app that shows real-time room availability, manages bookings, and gathers usage data for analytics
- Managed database on mLab and executed RESTful API to optimally receive and insert data
- Implemented TDD with Mocha and Chai throughout product lifecycle ensuring robust code and best dev practices
- Created modal which allows users to see daily room schedules and reserve rooms without double booking

Austin Art - Software Engineer | austinpublicart.herokuapp.com   2016
Online gallery of public art in the Greater Austin Area that allows users to discover, rate, and comment on public artwork
- Architected front-end dynamic appearance using React allowing the art to be the focal point of the site
- Maintained mLab database that stored Austin art, user information, comments, and likes
- Augmented app with React Navbar incorporating all site functionality within the Navbar to create a clean UI/UX

Have You Heard The News - Software Engineer | haveyouheardthenews.herokuapp.com   2016
News aggregator that retrieves nineteen news sources, sorts articles by good or bad news, and reads headlines to users
- Created button functionality with on-hover animation upgrading static news logos to dynamic site elements
- Built RESTful API call to IBM's Watson AI that utilizes the supercomputer to read the news headlines aloud
- Designed a clean user interface with responsive CSS for users to discover news both on the phone and computer

Experience

Freakylicious Subs, LLC - Owner/Operator   2012-2016
Jimmy John's Franchisee
- Increased sales by 11% annually; reduced food cost by 19% compared to national average
- Accounted for all managerial aspects of a 20-member team including: scheduling, marketing, hiring, and training
- Implemented, tested, and delegated an end-to-end checklist to more efficiently manage operational procedures
- Managed all financial aspects, including accounting, purchasing/negotiating, and cost control

Education

MakerSquare - Advanced Software Engineering Immersive   Austin, TX 2016
Rensselaer Polytechnic Institute - B.S. in Materials Engineering, Minor in Management   Troy, NY 2008-2012

Personal

Started an educational YouTube channel called broCoder to share coding knowledge with fellow students (2016). Became a Volunteer Firefighter in Loudonville, NY (2013-2014). Finished Ironman (Lake Placid, NY) with no prior experience in triathlons and no professional training (2013).
